

IMPACT OF FY14 BUDGET SEQUESTRATION ON US-FUNDED GLOBAL HEALTH PROGRAMS

amfAR has estimated the potential human impact of US budget sequestration in Fiscal Year 2014. This estimate is based on the latest available data on budget allocations, unit costs, and public health outcomes. A **7.3% cut to global health funding** through sequestration would have negligible impact on the US budget deficit but serious negative implications for the health of millions of people.
